

# make yourmark

At Towers Watson our associates help the world's largest multinational corporations tackle their key people, benefits and risk issues. If you have the talent and the drive, you could too.

## What defines us?

Towers Watson's mission is to contribute to their clients' success through utilising their unique capabilities and deep expertise. We provide the vision, ideas and answers to positively affect their business results.

## What we offer you

Our clients recognise the need for, and actively seek, the best ideas from the brightest minds in business, giving our consultants challenges and opportunities that are difficult to find anywhere else.

The role of the Software Solutions team is to deliver new software to business clients and the many hundreds of internal consultant users within Towers Watson. As a graduate or intern within our Software Solutions team you can expect an intentionally varied role involving:

- Discussing functionality with consultants
- Proposing solutions and generating prototypes
- Understanding and coding algorithms, ensuring that time and memory constraints are satisfied
- Iterating User Interfaces and researching new technologies and tools

This is all done within small agile teams that collaboratively contribute to the effective delivery of quality software. You will learn how software is produced and experience all aspects of today's industry best practices.

## Top three reasons to join us

- Structured graduate and intern programme
- Opportunities from day one for involvement in software development projects
- Collegiate working environment with world-class experts
